REGIONAL COUNCIL 9 TALENT DEVELOPMENT TASK FORCE MEETING OCTOBER 18, 2024

11:00 am to 11:45 AM 1001 Research Park Blvd., Suite 301, Charlottesville VA 22901 In-Person Meeting

MINUTES

Attending: Ethan Dunstan, Roque Castro, Cathy Schafrik, Rob Archer

Absent: Cheryl Kirby, Kim Blosser, Jean Runyon, Tina Weaver

Staff: Shannon Holland, Christie Taylor

Virtual Guests: Joseph Dennie, DHCD, Cody Anderson, DHCD

1. Welcome

Ethan Dunstan called the meeting to order at 11:06 AM.

2. Roll Call

A roll call was performed, as noted above.

3. Public Comment

No public comment was submitted or made at the meeting.

4. Approve Meeting Minutes

Roque Castro made a motion to accept the Meeting Minutes as presented while noting that members present today didn't participate at that meeting. Cathy Schafrik seconded the motion. The motion carried.

5. Grant Proposal Discussion: Talent Pathways Initiative Letter of Interest

Shannon Holland reviewed the Talent Pathway Initiative (TPI) Letter of Interest (LOI) process, as it differs from the application process. She noted that if the council accepts this letter at the October 29 Council Meeting, then there would need to be a motion allowing staff, along with the applicant team, to complete the DHCD application based on the letter details. The application would be due at noon on November 1, just two days after the meeting.

The LOI from CvilleBioHub for a BioBridge TPI project was reviewed by six council members. The main discussion centered on match. Staff shared that there is currently about a \$20,000 gap in the match needed for the project. The project team has a plan to address. The Task Force discussed ideas for helping close this gap including sharing with the Virginia Funders Network (VFN) and the PATH Foundation. It was also suggested other community colleges might be able to submit a match.

Roque Castro offered to reach out to VFN and PATH on the applicant's behalf.

6. Other Business

Shannon Holland shared that Region 3 was leading a statewide talent planning grant initiative along with Region 2 and they were asking for other regions to support. To meet the deadline, support would have to be discussed at the October 29 Council Meeting. That grant team has committed to providing a one-page summary and requests to staff for the meeting. In general, the \$100,000 planning grant would go

to the Virginia Chamber as part of the Blueprint Virginia initiative beginning January 2025. The chamber would include an Artificial Intelligence Statewide Landscape Assessment within their discussions across the state to consider how workforce training programs may need to adjust to the occupational demand changes presented by AI. Each region that supports is asked to sign a letter of support and support a regional private sector member and staff to participate. Roque Castro agreed to serve on behalf of Region 9, if appointed.

There was discussion and concern on the emphasis on AI, as the infrastructure and regulations for it are lagging. This concern will be brought up with the Council in discussion.

7. Adjourn

The meeting was adjourned at 11:59 PM.

GO Virginia Region 9

Executive Project Summary

Complete this form and submit it along with your proposal. (Maximum of 2 pages)

Project Name: Expanding the GO TEC Career Pathway in Region 9

Applicant: Albemarle County Public Schools (fiscal agent) in partnership with Charlottesville City Schools

and Greene County Public Schools **Contact Name:** Meagan Maynard

Grant Timeline: 24 months (January 2026 – January 2028)

GO Virginia Amount Requested: \$ 1,115,361.00

Match Amount Proposed: \$ 767,210 Local Match Subtotal: \$ 767,210

Match Breakdown: In-kind \$728,710 ; Cash - \$58,500

Localities Served: City of Charlottesville, Greene County, Albemarle County

Local Match Commitment From: Charlottesville City Schools, Greene County Public Schools, Albemarle

County Public Schools

Other Match Commitment From: (list here)

Letters of Support From: Region 9 Council, GO TEC/IALR, PVCC, local industry partners, Virginia Career Works – Piedmont, Center for Community Partnerships - UVA, Cville BioHub, Charlottesville Office of Economic Development, Afton Scientific, Charlottesville Albemarle Visitors Bureau, Charlottesville City Schools, 100 Black Men of Central Virginia, County of Albemarle Economic Development Office, Region 9 Virginia Partnerships for Health Science Careers, Greene County Economic Development and Tourism, Greene County Public Schools, Piedmont Virginia Community College, Trades & Tech Education Foundations, and Albemarle County Public Schools

Strategy: Talent Development

Region 9 Target Sectors this project is focused on:

Biomedical & Biotechnology, Financial & Business Services, Food & Beverage Manufacturing, IT
 & Communications, and Light Manufacturing.

Region 9 Growth Plan Opportunities Targeted:

• Strengthen the talent development pipeline in target industry sectors by encouraging collaboration among education, business and workforce partners to develop in-demand skills, retain local talent and attract new talent to the region.

Description: This project will be transformational for Region 9 by expanding the GO TEC (Great Opportunities in Technology and Engineering Careers) model into Charlottesville City Schools, Albemarle County Public Schools, and Greene County Public Schools. Developed by the Institute for Advanced Learning and Research, GO TEC brings advanced technology curriculum and industry-grade equipment into middle schools, creating early career exposure and skill-building experiences that directly align with regional workforce needs. For the first time, thousands of students across our communities will have

access to hands-on learning in emerging and high-demand fields that align with our target industry sectors. Funding will support teacher training, equipment purchases, curriculum resources, and regional coordination and technical support to ensure fidelity and long-term sustainability. This initiative will catalyze a pipeline, beginning in middle school, that connects education to industry, leading to advanced high school and postsecondary CTE and STEM programs, dual enrollment, industry-recognized credentials, and internships that drive the region's long-term economic growth and competitiveness.

[STAFF NOTE: project advances 3 strategies identified in the 2025 Growth & Diversification Plan Draft for Talent Development:

- Establish workforce coalitions and initiatives that enhance collaboration and efficiency within the Region 9 talent development ecosystem for target sectors.
- Advance sector-specific talent pathway planning, ensuring alignment of education and training with industry-specified needs.
- Implement talent pathway strategies spanning from middle school awareness to senior-level employment opportunities.]

Return on Investment: 0% at Year 3;	103% at Year 5	(from ROI Worksheet)
--	----------------	----------------------

GO Virginia Core Metrics and Committed Outcomes:

- Number of people trained: _3,126__ middle school students during the 2-year grant period
- Number of new programs implemented: __7_ across GCPS, CCS and ACPS middle schools

List Other Outcomes or Deliverables, if any:

New regional collaboration model for talent pipeline development

Highlight Major Grant Activities in Bullet format:

- Launch seven GO TEC Career Connection Labs in CCS, ACPS, and GCPS middle schools. These cutting-edge spaces are the region's first middle-school pipeline into high-demand technical fields, transforming career awareness for more than 1,500 students annually.
- Teacher Training & Support: Equip and support educators with the skills and confidence to
 deliver the GO TEC curriculum at the highest level. This professional development investment
 creates a cadre of regional teacher-leaders capable of sustaining and scaling workforce-aligned
 instruction for years to come.
- **Pathway and Sector Alignment.** Integrate learning experiences with Region 9's priority industry sectors to create seamless transitions to high school programs, dual enrollment, and work-based learning opportunities, catalyzing long-term workforce development.
- Grant Management and Administration: ACPS will serve as the in-region coordinating entity, providing a dedicated coordinator to ensure efficient implementation and a unified regional approach to advancing workforce readiness.
- IALR Support: The Institute for Advanced Learning and Research (IALR), as the statewide GO TEC lead, will deliver critical technical assistance and implementation support. Their expertise accelerates regional capacity to deliver innovative workforce solutions.

Al Mobile Unit for Workforce & Education GO Virginia Regions 6 & 9

The AI Mobile Unit for Workforce & Education is a multi-regional initiative that directly addresses the growing demand for artificial intelligence (AI) skills across GO Virginia Regions 6 and 9. By deploying mobile training labs equipped with laptops, connectivity, and instructional software, the project brings AI literacy, ethics, prompting, and certification training directly to schools, workforce centers, and businesses. This model ensures equitable access for rural and underserved communities while embedding AI competencies into K–12 pipelines, teacher professional development, and incumbent workforce training.

Project Activities Staff Note: Applicant team is developing strategy for how these activities will be delivered across regions or localities

The initiative will deliver a comprehensive suite of programs:

- Teacher Training & Certification: 40–50 educators certified annually with CompTIA's Al credential, embedding Al integration into classrooms and ensuring sustainability.
- Student Workshops and Certification: 80 workshops each year, serving ~2,000 students in grades 9–12 with AI literacy, ethics, and prompting skills. 200 Senior students certified over two year grant period.
- Community Workshops: 20 per year, providing reskilling and upskilling for adult learners.
- Business Training: 20 employers per year served with applied AI workshops that directly support traded-sector competitiveness.
- Dual Enrollment Pathway: By Fall 2027, establish community-college partnerships that allow high school students to earn Al college credit.

Outcomes outcomes between

Staff Note: Applicant team is developing allocation of these outcomes between regions/localities

Over the two-year grant period, the project will achieve:

- 2,000 students trained in Al literacy.
- 200 12th-grade students earning AI certifications, strengthening their readiness for both college and career pathways.
- 80 educators credentialed through CompTIA AI certification.
- 20 businesses served with tailored Al workshops.
- Dual-enrollment pathway launched in Year 2, enabling students to earn college credit.
- New workforce training model implemented, replicable statewide.

Regional and Economic Impact

This initiative supports the growth of traded-sector industries identified in both Regions 6 and 9's Growth & Diversification Plans—including Professional, Scientific, and Technical Services; IT & Communications; Cybersecurity; Advanced Manufacturing; and Biotech. By embedding AI skills into these clusters, the project builds a robust pipeline of AI-ready talent, supports higher-wage job growth, and enhances regional competitiveness.

Equally important, the mobile design ensures access for rural localities (Northern Neck, Middle Peninsula, Piedmont), addressing talent outmigration and limited exposure to advanced training. By preparing students, teachers, and workers for Al-enabled careers, the project strengthens both workforce resilience and employer attraction/retention across both regions.

Partnerships and Governance

The project will be led by the Cyber Bytes Foundation (CBF) in partnership with the Academy of Technology and Innovation (ATI), serving as applicant and fiscal agent. A coalition of partners—including Rappahannock Community College, the Bay Consortium Workforce Development Board, Orange County, Fauquier County, Stafford County, King George County, local school divisions, and industry leaders such as GT Edge AI, GCubed, Smart Communities Exchange, and X Corp Solutions—will provide curriculum, facilities, advisory participation, and over \$600,000 in match contributions.

A multi-regional Advisory Board will guide implementation, meeting monthly during the first phase and quarterly thereafter to ensure accountability and alignment with local workforce strategies.

Sustainability and Scalability

The project's long-term stability is supported by:

- An industry rental model allowing businesses to fund ongoing unit operations.
- Pursuit of federal and state grants (NSF, NIST, DOL, DOE, EDA, DoD STEM).
- Integration of AI certification into teacher training and dual enrollment curricula.

Following implementation in Regions 6 and 9, the model will scale to Regions 5 and 7, then Regions 3 and 4, and ultimately statewide. The Al Mobile Unit establishes Virginia's foundation for a sustainable, equitable, and industry-aligned Al workforce infrastructure.

REGION 9 GO VIRGINIA – COMPETITIVE GRANT REVIEW RUBRIC Led by Region 6 Partnering with Region 9

5. The localities participating in the activities of the project are noted	
and their commitment adequately documented in match forms,	
narrative or letters of support. At least two localities are represented.	
6. The proposal describes how the grant team has engaged with local	
government, private sector and subject matter experts in validating the	
strategy and approach of the project.	
7. The project has an adequate range of partners, each with a	
documented meaningful role.	
8. The proposal identifies cost efficiency, repurposing of existing funds,	
leveraging of existing assets and other evidence of collaboration.	
9. This proposal explains how this project is additive and not duplicative.	
DDOIECT DEADINESS	
PROJECT READINESS Refer to Application Questions: 10-13	Up to 20 total points
10. Proposal includes a clear timeline and adequate milestones to track	
project and projected funds drawdown. The applicant has the ability to	
address issues and take remedial action as necessary.	
11. Projected expenses and uses of committed match are aligned with	
project activities.	
12. Potential barriers have been identified and the project administration	
team has a team in place to address those that arise.	
13. Pre-requisite activities undertaken by the project partners to increase	
effectiveness of this grant delivery are described and adequate.	
PROJECT SUSTAINABILITY	Up to 15 total points
Refer to Application Question: 14	op to 10 total points
14. The proposal has identified a path forward for long-term	
sustainability beyond the grant period.	
BUDGET – SEE BUDGET WORKBOOK in proposal	0 points
Budget is reasonable and realistic for scope of project and stated	
efficiencies and Budget Narrative supports proposed budget. Adequate	
descriptions are provided in the workbook. Yes No Needs clarification

2025 GROWTH PLAN OPPORTUNITIES

The GO Virginia Region 9 Council invites grant proposals that deliver outcomes for the Region 9 target sectors of Biosciences; Financial & Business Services; Food & Beverage Manufacturing; Information Technology & Communication or Light Manufacturing

Talent Development

- 1. Establish workforce coalition(s) or initiatives that enhance collaboration and efficiency within the Region 9 talent development ecosystem for target sectors regionally or subregional.
- 2. Grow an AI-ready workforce to advance the competitiveness of region 9's target sectors informed by the AISLA Project Blueprint Report. (Fall 2025)
- 3. Advance sector-specific talent pathways planning efforts, ensuring the alignment of education and training with industry specified needs in each target sector.
- 4. Implement talent pathway strategies spanning from middle school career awareness to senior-level employment opportunities
- 5. Develop sector-driven credentialing, micro-credentialling, apprenticeship, upskilling, and internship (high school, adult) programs designed to meet the demands of target industries
- 6. Assess and address regional target sector workforce needs to fill high demand occupations

Grow Existing Business

- 1. For each target cluster, re-evaluate member industries within each cluster as defined and identify gaps in growth to develop recommendations for future implementation grants.
- 2. Support implementation grants from gaps identified through planning grants or other regional reports
- 3. Support sector led initiatives that address business-validated sector gaps to traded sector growth.
- 4. Catalyze AI & technology adoption in target sectors that drive sector growth and competitiveness

Entrepreneurship

- 1. Expand the number of sector specific industry support organizations (peer groups) that will provide mentorship, education, community, and resource exchange for target sectors entrepreneur leaders.
- 2. Establish coordinated sector specific incubators or accelerators when demand is validated
- 3. Widen founder education about capital sources and connect more capital

Sites

- 1. Advance development of regionally significant sites.
- 2. Identify new potential sites in the region for these sectors.
- 3. Create a regional site development plan for target sectors.
- 4. Support future projects from the regional sites plan, once completed.
- 5. Assess benefits of collaboration on site development, such as RIFA development opportunities.

Other

- 1. Support planning grants to assess, map, and catalyze growth in emerging industries for which the region may have a competitive advantage
- 2. Support implementation grants that address recommendations identifed in emerging industries planning grants
